Held-out placement, four estimator families (12/16 within tolerance)
perfect placement ($\hat{\pi} = \pi^*$)
±8 percentile-point tolerance band
Llama-3.3-70B (4/4 in band)
Qwen3.6-35B (2/4 in band)
Gemma-3-27B (3/4 in band)
Mistral-Small-24B (3/4 in band)
outside the reference score band
placement fixed before evaluation $\hat{\pi}$ (percentile points)
realised optimal percentile π^* (percentile points)
